

CLASSIFICATION KS2

Animals can be organised by more than what they eat! The main groups of animals are mammals, birds, reptiles, amphibians, fish and invertebrates.

PLACE TICKS IN THE TABLE UNDER THE CORRECT ANIMAL GROUP.
The first row has been done for you.

	INVERTEBRATES	FISH	AMPHIBIANS	REPTILES	BIRDS	MAMMALS
Has a backbone		✓	✓	✓	✓	✓
Breathes through gills underwater						
Has slimy skin						
Lays eggs						
Nurse their young with milk						
Has scales						

Put the name of your favourite animal in the column on the right of the table.

Tick the qualities that it has, which group do you think it belongs to?
